

Secure DevSecOps Platform Architecture

Zero Trust • Infrastructure as Code • Automated CI/CD • Observability

IDENTITY & ACCESS (ZERO TRUST)

- Single Sign-On (SSO)
- Multi-Factor Authentication (MFA)
- Identity Federation
- Role-Based Access Control (RBAC)
- Least Privilege Access

ENVIRONMENTS

Automated Promotion Through CI/CD Pipeline

SECURITY BEST PRACTICES

- ✓ Zero Trust Security Model
- ✓ Infrastructure as Code
- ✓ Automated Security Scanning
- ✓ Encrypted State & Secrets
- ✓ Least Privilege IAM Policies
- ✓ Container Vulnerability Scanning
- ✓ Continuous Monitoring & Alerting

This architecture demonstrates a secure, scalable, and automated DevSecOps platform built with Terraform, GitHub Actions, AWS, Kubernetes, and industry best practices.
